

A photograph of four firefighters in full protective gear, including helmets and oxygen tanks, working together to extinguish a large fire. They are using a high-pressure hose that creates a massive spray of water. The background is filled with intense orange and yellow flames and thick black smoke.

- 40% visitor was excellent and 56% visitor was good termed by participants.
- 52% Managers & Directors, 26% engineers & consultants, 22% Govt. officer were among the key visitors.

Fire India 2013:

A step further to milestone of success, ninth edition of Fire India is scheduled from **24th -26th October 2013, Bombay Exhibition Centre, Goregoan, Mumbai, Maharashtra, India**. A much awaited industry event is back with promising opportunities to facilitate to cater more business surface to the fire manufacturers world-wide. The successful execution of eighth edition in 2011 marked its foot-print of profuse business avenues in the memories of the industry. SI (Services International), with a promise to serve industry's objectives better once again geared up to flavor business opportunities with more superior taste to it. Fire conglomerates from around the world will have their presence once again in the event displaying latest & improved technologies. Crème de la crème of fire industry from around the world will add glitter to the vibrant experience of the event.

The Conference:

The conference is an integral part of the exhibition being organized by IFE (India). The conference will have series of interactive sessions on key issues of topical interest. Fire industry technocrats gather from around the world to attend the conference. Highly successful Fire India 2011 conference was recognized as most potent technical exchange platform.

The conference organized in 2011 was highly applauded by the experts and industry, the theme was "Fire Risk Alleviation Readying for Excellence". The duration of the conference was three days and it comprised of seven technical sessions wherein eminent professional experts from around the world presented their research papers. The conference received overwhelming response from technocrat across the world. Once again the conference has proved its worth to be the most effective platform for sharing the ideas for the upliftment of the industry and better means of combating with fire & serving mankind.

Fire India 2013 will be a perfect interface between buyers and manufacturers.
